Oliver Kessler Design – passion for the extraordinary

Merging the tradition of different cultures with timeless design, new materials and modern technology is the core of projects designed and developed by German designer Oliver Kessler.

This year, following the announcement of Qatar as the host of the World Cup 2022, Oliver Kessler Design showcases for the first time ever the bedside table lamp 'Vincerò' with a design influenced by sports trophies. It also draws a bow to Qatar's currently highest tower, the Aspire Tower.

Vincerò, which means 'I shall win!' is about 320 mm in height and plays with transparent, semi-transparent and reflective surfaces to transport light.
